## MARION'S CEMETERY

### A Landscape Gardener or Park Keeper to be Employed to Keep "The City of the Dead"

THE RECORD-PRESS is glad to announce to the people of Marion that the much vexed problem of Cemetery supervision and care, which has been before us for a number of years, has at last been solved.

Pursuant to a notice in these columns last week, a number of Marion citizens met in the School Auditorium and perfected an organization, which has for its purpose the acquisition of and care for our "city of the dead." There were very few present at this meeting, but those few were very much in earnest.

A Cemetery Association was organized with H. K. Woods, Pres., H. V. Stone, J. F. Dodge, T. H. Cochran, Mrs. G. M. Crider and Miss Nelle Walker were made directors and Miss Nell Walker, Sec'y and Mrs. G. M. Crider, Treas. The above named directors were authorized to see J. Bell Kevil, the present owner of the cemetery grounds, and secure if possible, an option thereon.

This has been done and the option is good for thirty days. The Cemetery Association is now making an effort, and hopes to be able to sell enough lots at a reduced price during the next thirty days to pay the most, if not all, of the option price. Lots in this new cemetery have been selling for \$20., a price for several years past, but in view of this emergency and in the endeavor to get this affair in shape, the Cemetery Association has decided to sell twenty lots at \$15. per lot to the first applicants, those who make the first application to have choice of lots. After these twenty lots are sold the price will again be placed at \$20.00 a lot.

It may be best to state here, so that all may clearly understand, that this enterprise is not a money making scheme for any person or persons. All the money made by lot sale or by personal subscription or by gift is to be placed in a fund which shall be used solely for the purpose of beautifying and keeping in order the cemetery.

In order to augment this fund, it has been deemed best that all the present lot owners should pay into the treasury of this Association the sum of \$3.00 per annum for the purposes stated above. The committee requests all present lot owners to send this sum of money to Miss Nell Walker at once and she will receipt you for same. They desire to begin this work by the first of June and so please send your subscription at once. A detailed report and itemized account will be published in this paper annually that everyone may see what has become of his subscription.

The first subscriber, for one of the twenty lots, to be sold by the cemetery committee, was John A. Moore. He got first choice. The 2nd T. A. Frazier, 3rd W. A. Blackburn, 4th W. H. Copher, 5th G. M. Crider, 6th R. H. Kemp, 7th S. M. Jenkins.

### Death of a Lady Well Known in Marion.

Mrs. Charles Gallagher, one of the most beloved ladies in Cairo, died there Sunday from paralysis. She had lived in the city for over fifty years and was widely known there and elsewhere. Frederick Gallagher, both of Cairo, and Mrs. Reese Dugan, of Denver, Colo., and two brothers, Arnold C. Lippitt and Capt. W. D. Lippitt survive her.

Mrs. Gallagher was a visitor in former years at Crittenden Springs hotel and had friends in Marion, who remember her gracious and charming manner. Her home in Cairo was one of the mansions of that city, noted for its hospitality and many notable characters had been entertained there, among them, Gen. U. S. Grant and his family when returning from their tour around world.

## BITS OF BYPLAY.

Some Crittenden county dirt is very poor. A certain Marion citizen was approached for a loan of a sum of money. As a precautionary measure he made an inspection. He stated that he found the ground so poor that the heads of the oats were barely out of the ground. He declined to make the investment.

??

Mr. O. L. Bass, president of the Marion Mineral Company, and a resident of Florida, was in Marion a few days ago. Mr. Bass formerly lived in Hopkinsville and together with his neighbor, Mr. R. E. Cooper, they came to Marion and made some heavy investments in the mining business. This was about the year 1902. Since that time Mr. Bass has removed to Florida, the land of sunshine, alligators and J. W. Bigham. Mr. Bass made his first money in the pine woods of the Carolinas. Immense fortunes have been accumulated in the last fifteen years in pine tar. The making of pine tar and dye-making from coal tar are the healthiest trades in the world. Tar and the smell of it is the best of all tissue builders. The average life of a tar worker is eighty-six years. The moral is eighty per cent. lower than in any other factory trade.

??

A man walked into a store in Marion one day and said:

"Have you any pine tar?"  
Not hearing the question very well the merchant replied,  
"No, I have not been on a tear since last March."

Dan Riley is back. We did not hardly expect him. He is anxious to get away to Texas again with his family, but the present epidemic of measles has a firm hold on his family. It is very interesting to hear the news from Texas hot off the bat. Dan Riley is not the only one who came back from Texas. There are others. From what we can learn Hereford and Portales are fine towns. Everybody and everybody's brother in that country is a land agent. Farms, quartersections, sections and whole townships change hands at the twink of an eye. The purchaser of today is the seller of tomorrow and the poor recorded of deeds is the most overworked individual in the whole state. The real estate agents of those pan handle towns are certainly up-to-date. They no more and live more in one day than the ordinary Kentucky man does in five days. They own their own horses and rigs and automobiles and their trades and sales are made with a breezy slap dash that quite takes your breath. A good story is told of a Kentucky tenderfoot. No doubt the same thing has happened frequently to other tenderfooted strangers. Mr. Tenderfoot alighted from the train with a pocket full of the long green. He was hungry and thirsting after land. He wanted a section about six miles from town. All was bustle and fuss. He was carefully stowed away in a sixty horse power automobile, the driver mounted the front seat and threw open the throttle. With a honk-i-ty honk the huge machine tore across the level country leaving behind a cloud of dust permeated by a bad smell. A wordy description of God's country fell from the agent's lips in a continuous stream. In a few minutes they were there. The particular section suited. The return trip was made in like manner. With lightning like rapidity the deal was closed. The particular section belonged to a party in Michigan or Maine and it "he only knew how land was selling down here you would have to pay \$4 more per acre, Mr. Tenderfoot, which multiplied

by 640 would be \$2560. Mr. Tenderfoot you are a lucky man. Thank you." A few months after this Mr. Tenderfoot endeavored to close out this good thing section and stated to the would be purchaser that it was six miles from town. He was more or less jarred to find upon strict examination and due investigation that it was thirty-eight miles from town. The swift moving automobile had annihilated space.

Texas is a land of all kinds of climate. You can get anything you are looking for there which recalls the story of the yoke of cattle. The man who owned the cattle was telling of "where he came from" and what a changeable climate it was. In driving his yoke of cattle one day one of them became overheated and died. In order to save what he could he proceeded to skin the dead ox, but before he could get him skinned the other froze to death.

### A Compromise Suggested.

Evansville, Ind., May 17.—The first blood shed in the street car strike, that was called yesterday, came this afternoon about 2 o'clock, when a street car on the Walnut-street line, going at full speed, dashed into the front of a confectionary, tearing away the whole front of the structure, killing one person, mortally injuring two persons and seriously injuring several others.

Alum is used in some baking powders and in most of the so-called phosphate powders, because it is cheap, and makes a cheaper powder. But alum is a corrosive which, taken in food, acts injuriously upon the stomach, liver and kidneys.
